MEMORANDUM FOR: Director of Central Intelligence
FROM: SA/DCI/IA
SUBJECT: Director's Nuclear Intelligence Panel Meeting,
16 March 1984

1. You are scheduled to meet with your Nuclear Intelligence Panel in the DCI Conference Room, at 1330 hours, Friday, 16 March. This will be the closing session of a two-day panel meeting. The panel Chairman, Dr. [redacted] was not present for Thursday's session and may not be there on Friday due to illness. Your senior officer attached to the panel is [redacted] Chairman, JAEIC.

NUCLEAR INTELLIGENCE PANEL

I. Function

The Nuclear Intelligence Panel will be constituted as an advisory body to the Director of Central Intelligence and will as appropriate review intelligence on foreign nuclear energy programs. They will consider at least the following specific subjects as they pertain to the USSR, China, and other countries involved in the use of nuclear energy or in the production of nuclear weapons:

Fissionable material research and development

Fissionable material production

Reactor research and development

Nuclear power production

Nuclear propulsion

Controlled thermonuclear reactions

Nuclear weapon research and development

Nuclear weapon design

Nuclear weapon test sites

Nuclear weapon testing

Nuclear weapon fabrication

Nuclear weapon stockpiles

Nuclear weapon command and control

Nuclear proliferation to other countries

SECRET

The Panel will:

Review and make recommendations regarding judgments made by the intelligence community on available intelligence

Examine and recommend improvements in collection and analysis techniques

25X1

Suggest trends in foreign nuclear programs

Recommend changes in the intelligence methods required to keep abreast of foreign nuclear technology

II. Method of Operation

The Panel should meet at least twice a year with one of these meetings scheduled just prior to USIB action on the Soviet Nuclear Energy Program Estimate. The second meeting should be used primarily for review of new information and the consideration of at least one specific intelligence problem. One or more additional meetings per year may be called at the request of the DCI or the Panel Chairman if unusually significant new nuclear intelligence becomes available or if the pace of foreign nuclear activity is significantly increased. The meeting which is directly associated with National Intelligence Estimates will be held at CIA headquarters but the other meeting or meetings may be held outside the Washington area should this be desired by the Panel Chairman.

At the conclusion of each meeting, the Panel will summarize their findings and recommendations in a written report to the DCI. This report will normally be augmented by a verbal discussion with the DCI and, as appropriate, with the USIB. A representative of the DCI will prepare a written record of the verbal discussions and after approval by the Panel Chairman it may be distributed to USIB members.

The DCI will select an appropriate CIA official who will be responsible for all administrative support to the Panel. This official will, in coordination with the Chairman, prepare an agenda for each meeting and arrange for necessary briefings and background material. Representatives of USIB member agencies may be requested to brief the Panel on subjects within their competence, particularly when there are differences of opinion within the intelligence community. Arrangements for non-CIA briefings or participation will be accomplished through the Joint Atomic Energy Intelligence Committee.

SECRET

SECRET

III. Membership

Members will be selected from industry, educational institutions, AEC, and the military departments. A member will normally be requested to serve for a period of three years. However, in the initial selection some members will be requested to serve only two years and others for four years so that there will be no complete change over of membership in any one year. Once a continuity pattern has been established no member will be requested to serve more than three years but may be reappointed if desired. Each member will be requested to participate as an individual and none will be considered as a representative of any element of the intelligence community or other government agency. In addition to the regular membership a few individuals may be requested to serve on an ad hoc basis by mutual consent of the Panel Chairman and the DCI.

MEMORANDUM FOR: Chairman, Nuclear Intelligence Panel
FROM: Director of Central Intelligence

1. Thanks for your response to my request for concise information about what the panel is doing, how well it is doing, and how it might do better.

2. I would like recommendations on how we can provide more feedback to the panel and do more work in between meetings in order to better utilize its efforts and focus its work on topics in a timely manner as is suggested in the last sentence of memorandum.

DIRECTOR OF CENTRAL INTELLIGENCE
Joint Atomic Energy Intelligence Committee

17 November 1983

MEMORANDUM FOR: Director of Central Intelligence
Deputy Director of Central Intelligence

FROM:

Chairman, Joint Atomic Energy Intelligence Committee

25X1

SUBJECT: DCI's Nuclear Intelligence Panel

25X1

1. The Nuclear Intelligence Panel, an advisory body to the DCI, has recently been concerned with such subjects as 

In addition to discussing its views and recommendations with the DCI, the Panel prepares a report after each of its meetings, which are generally held twice annually. The Panel's report is distributed within the Intelligence Community, primarily to support and stimulate nuclear intelligence efforts. (S)

2. On numerous occasions, appreciation of the value of the Panel's efforts and advice has been expressed by DCIs. The Panel meetings are well attended as are the several subpanel meetings which are held between regular sessions of the full Panel. All elements of the Intelligence Community actively support the Panel through the JAEIC mechanism. (S)

3. The impact of the views of the members (selected from industry, educational institutions, and government) stems from their breadth of experience, knowledge and expertise related to nuclear energy matters. Recent efforts to determine actions taken based on the Panel's recommendations have been useful and the Panel is updated regularly on such matters. Even more feedback to the Panel probably would help to better utilize its efforts and focus its work on topics in a timely manner. (S)

MEMORANDUM FOR:

[redacted], Chairman
Joint Atomic Energy Intelligence Committee

25X1

FROM:

Executive Director

The DCI is reviewing the work of DCI, Intelligence Community and CIA intelligence committees. He asked that I pass the request along to his committees at the same time CIA is tasked. The DCI asked that committee Chairmen prepare for his personal attention a brief paper of no more than three paragraphs, each addressing:

- What the committee has done and where its current focus lies.
- How well the committee's work is going.
- How the committee's contribution might be enhanced.

The DCI also noted that he would welcome any existing papers which are informative or illustrative of the committee's work and asked for a response one week after receipt of his request.

[redacted]
Charles A. Briggs
